Description

Description:

The ABC of Research Methods: Notes for Graduate Students is a practical academic guide designed to help university and postgraduate students understand the fundamentals of research. The book introduces essential research concepts, methodologies, and techniques used in academic studies and thesis writing. It provides step-by-step guidance on choosing a research topic, developing research questions, collecting and analyzing data, writing literature reviews, and preparing professional research reports. Written in a simple and student-friendly style, this book serves as a valuable resource for graduate students, researchers, and anyone seeking to improve their academic research skills.
