#### Sharaxaad

Sharaxaad:

The **Tecno Spark 30 (128GB / 8GB+8GB RAM)** is a 2024/2025 release that positions itself as a "style-first" budget powerhouse. It is a significant step up from basic entry-level phones, specifically designed for younger users who care about gaming performance and aesthetics.

#### 16GB RAM" Explained

The "8GB+8GB" branding can be a bit confusing. Here is the reality:

- **Hardware RAM:** The phone has **8GB of physical RAM**, which is excellent for this price point.
- **Extended RAM:** It uses **8GB of "Virtual RAM"** (borrowed from your 128GB storage) to help keep more background apps open.
